Nozzles

Benefits

- Secured in **grommets** for easy removal and replacement.
- **Patented** and [lab](#) tested BAC design, preventing scale build-up that reduces the unit capacity.
- **Large orifice** 360° umbrella pattern spray, eliminating dry spots.
- **Non-clogging** design.
- **For all system flow rates.**
- For **pressurized** or **gravity** distribution system.

Caution tip

When **cleaning nozzles** do not use a screwdriver or other instrument to force debris through the nozzle. The bottom of the nozzle is a target area that diffuses the water over the fill or coil in an umbrella type pattern. If the target area is broken, the water will pour straight onto the coil-fill surface, possibly causing damage to the fill and/or dry spots on the coil. In addition, the debris can now possibly begin to clog the fill.
