Make-up

Make-up

Replacement kits typically include: float valve, float ball and the appropriate float arm to suit the specific unit type.

Valve

- **Heavy duty robust design** allows for adjustment of the float arm angle without any tools.
- **Corrosion resistant** brass body, suitable for all high pressure applications.
- Performance tested in BAC's R&D lab
- Ease of maintenance and adjustment
- Available in sizes 20, 25, 50 mm.
- Retro-fit replacement kits for all products.

Float ball
