

Ladder, safety cage and handrail

Closed circuit cooling towers

Options and accessories

Ladder, safety cage and handrail

A ladder, safety cage and handrails are all installed for **easy access to the unit top and easier and safer** inspection and maintenance, in line with **European and South African safety standards** . For units equipped with these options, we also recommended installing [steel drift eliminators](#).

Want to extend your cooling tower with these options for easier and safer inspections?

Contact your [local BAC representative](#) for more information.
