

# Belts

## Spare parts guide

### Belts

#### Belts

##### Benefits

BAC belts are selected and [tested](#) for each BAC unit type, ensuring **year-round reliable** and **vibration-free operation** of your BAC cooling equipment.

##### Features

- Type, size and quantity of belts depend on BAC unit type.
- Minimum operating life-time expectancy of 25.000 hours.

##### Maintenance tip !

When replacing belts on a multiple belt drive system always make sure to replace the complete set, and re-check alignment and tensioning.

Proper **belt tension** is vital for a long belt service life. Check the [operating and maintenance manual](#) of your BAC equipment for proper belt tension information.

**Want to replace the belts of your BAC cooling equipment?** Contact your [local BAC representative](#).
