

Filtration

Water treatment and filtration equipment

Key benefits

- Long service life of your cooling system
- Optimal efficiency of your heat transfer media (fill or coil)
- Less maintenance and downtime
- Help optimize water treatment equipment

For optimal cooling performance and maximum system hygiene install also

- an automatic [bleed control](#) (BCP 0 C)
- water treatment equipment for [liquid](#) (BCP 2 C) or [solid](#) (Easy Treat) chemicals
- a factory installed [sump sweeper piping](#)

Filters remove suspended solids in water. Filters work best alongside [sump sweeper piping](#) which increase water circulation and agitation in the basin preventing the solids to settle in the sump or basin.

BAC offers a complete range of filtration systems :

- [PF 64 Series separator](#)
- [PF 30 Series media filter](#)

Want to install a filter on your cooling equipment? Contact your [BAC representative](#) for more information.
