Top air inlet shields

Top air inlet shields

Top air inlet shields are [combined inlet shields](#) protecting the air inlet above the heat exchange coil.

- Eliminate water splash-out at low fan speed or the fans cycled off.
- Protect the circulating water from exposure to sunlight, hence they reduce the growth of algae or harmful bacteria.
- Act as a filter, preventing contamination of the basin water due to debris and reducing basin cleaning
- Corrosion and UV resistant polypropylene honeycomb material.
- Light weight, easy to handle and to remove without tools.
- Upgrade kits available for all models CXV, [CXVE](#), [CXV-D](#), FXV, [FXVE](#), [FXV-D](#).

Want to benefit from top air inlet screens? Contact your [local BAC representative](#).
