Closed circuit cooling towers

Options and accessories

Motor removal davit

With the motor removal davit, the motor **can easily be lowered from or lifted to** the motor base without the need for extra heavy material or scaffolding.

The motor base rotates allowing the motor out of the unit through the large access door, enabling you to lower the motor.

- Accessory available for FCI 144 and FCI 215 models only.

Want to install a motor removal davit? Contact your [local BAC representative](#) for more information.
